

April 16, 2018

Permit #: NE-2018-70-0667
Fee Received: \$170.00

Kusel, Wilson, and Round Lake P&R Dist.
Jeremy Gaboury
W5463 Archer Lane
Wild Rose, WI 54984

Subject: 2018 permit to chemically treat aquatic plants in Kusel Lake, Waushara County.

Dear Mr. Gaboury:

The Department has received and reviewed your application to chemically treat aquatic plants in Kusel Lake, Waushara County. The total acreage to be treated is **5.85** acres. Your permit application meets the minimum requirements by law and a permit is being issued. Issuance of the permit is not an endorsement or approval for the actions authorized. The following conditions must be complied with:

GENERAL CONDITIONS

- 1) It is the responsibility of the applicant to follow the treatment plan and permit conditions. Noncompliance with the plan can result in enforcement actions under State Statute 144.99 and restriction of aquatic plant management activities for subsequent years under Administrative Code NR 107. The conditions and treatment plan are required to ensure efficacy of the treatment and is well documented.
- 2) Wisconsin Lake & Pond Resources, LLC, according to NR 107.08(8), shall submit the enclosed Aquatic Plant Management Treatment Record form (3200-111) for treatment as follows:
 1. Immediately, if any unusual circumstances occur during treatment.
 2. Within 30 days, if treatment occurs.
 3. By October 1 of this year if no treatment occurred.
- 3) Application is restricted to permitted area.
- 4) All docks and all public access must be posted as specified in NR107.08 (7). Signage must remain in place for the full period specified on the chemical product labels.
- 5) Public access cannot be blocked or entry denied. Treatment will have to be scheduled accordingly to increase efficacy and to achieve the desired outcome.

SPECIFIC CONDITIONS

- 1) Chapter NR 107.04(4) Wisconsin Administrative Code states that the applicant, Kusel, Wilson, Round Lakes P&R Dist. – Jeremy Gaboury, must certify a copy of the application has been provided to any affected property owners, inland Lake District and in the case of chemical applications for rooted aquatic plants, to any riparian property owners adjacent to and within the treatment area.
- 2) Herbicides used for the project will be Aquastrike (endothall, diquat) for Eurasian water milfoil and curly-leaf pondweed. Tribune (diquat) and Captain (Copper) for nuisance natives. All product labels must be followed closely.
- 3) The timing of the early season AIS treatment should be done as soon as possible before native plant species become well established. If natives are well established at time of treatment permit may be denied.
- 4) Treatment targeting native aquatic vegetation for navigation may not be done until a visit from the Wisconsin DNR (Ted Johnson and Chris Kolasinski). If it is determined that navigation is being materially obstructed by aquatic plant growth treatment may commence immediately following the inspection. If the inspection reveals that navigation is not materially obstructed by aquatic plants, the department may stop or limit the treatment pursuant to NR 107.05(3), NR 107.07, and NR 107.08.
- 5) Due to the presence of threatened species, treatment should shall occur only with wind speeds less than 10 mph to minimize potential shoreline impacts.
- 6) You must notify Christopher Kolasinski of the Department of Natural Resources at (920) 252-5053 or Christopher.Kolasinski@wisconsin.gov at least 4 business days prior to any chemical treatment.
- 7) The following steps should be taken every time you move your equipment to avoid transporting invasives and exotic viruses and species. To the extent practicable, equipment and gear used on infested waters should not be used on other non-infested waters.
 1. Inspect and remove aquatic plants, animals, and mud from your equipment.
 2. Drain all water from your equipment that comes in contact with infested waters, including but not limited to tracked vehicles, barges, boats, silt or turbidity curtain, hoses, sheet pile and pumps.
 3. Dispose of aquatic plants, animals in the trash. Never release or transfer aquatic plants, animals or water from one water-body to another.
 4. Wash your equipment with hot (>104° F) and/or high pressure water OR allow your equipment to dry.

Any future treatments beyond this permit will require an additional permit from the Department. Future permit applications will be evaluated based the information at that time. Failure to comply with the above conditions may result in cancellation of the permit and loss of permit privileges in the future.

If you have any questions or concerns I can be reached at (920) 252-5053 or by e-mail at Christopher.Kolasinski@wisconsin.gov .

Sincerely,

A handwritten signature in cursive script that reads "Christopher Kolasinski". The signature is written in dark ink and is positioned below the word "Sincerely,".

Chemical Aquatic Plant Control Application and Permit WPDES Pesticide Pollutant Permit Application

Form 3200-004 (R 02/17)

Page 2 of 4

Section III – Fees

1. s. NR 107.11(1), Wis. Adm. Code, lists the conditions under which the permit fee is limited to the \$20 minimum charge.
2. s. NR 107.11(4), Wis. Adm. Code, lists the uses that are exempt from permit requirements.
3. s. NR 107.04(2), Wis. Adm. Code, provides for a refund of acreage fees if the permit is denied or if no treatment occurs.

4. Fee calculations:

If proposed treatment is over 0.25 acre, calculate acreage fee:
(round up to nearest whole acre, to maximum of 50 acres.)

6 acres X \$25 per acre = \$ 150

If proposed treatment is ≤ 0.25 acre, acreage fee is \$0.

Enter Acreage Fee (from above) \$ 150.00

Basic Permit Fee (non-refundable) \$ 20.00

Total Fee Enclosed \$ 170.00

Site Map: Attach a sketch or a printed map of lake indicating area and dimensions of each individual area where plant control is desired and flow of surface water outside treatment area. Also show location of property owners riparian to and adjacent to the treatment area. Attach a separate list of owners and corresponding treatment dimensions coded to the lake map, if necessary.

Section IV – Reasons for Aquatic Plant Control

Is this permit being requested in accordance with
an approved Aquatic Plant Management Plan?

☒ Yes ☐ No

Treatment Type:

☒ Lake ☐ Pond ☐ Wetland ☐ Marina ☐ Other

Goal of Aquatic Plant Control:

1. ☒ Maintain navigational channel
2. ☐ Maintain boat landing and carry in access
3. ☐ Improve fish habitat
4. ☐ Maintain swimming area
5. ☒ Control of invasive exotics
6. ☐ Other: _____

Nuisance Caused By:

- ☐ Algae
- ☐ Emergent water plants (majority of leaves and stems growing above water surface, e.g. cattails, bulrushes)
- ☐ Floating water plants (majority of leaves floating on water surface, e.g., waterlilies, duckweed)
- ☒ Submerged water plants (leaves and stems below water surface, flowering parts may be exposed, e.g., milfoil, coontail)
- ☐ Other: _____

List Target Plants

Note: Different plants require different chemicals for effective treatment. Do not purchase chemical before identifying plants.

Curly-leaf pondweed, Eurasian water-milfoil, and potential general nuisance vegetation control

Section V – Chemical Control

Alternatives to Chemical Control:

Feasible?

If No, Why Not?

1. Mechanical harvesting

☐ Yes ☒ No

Spreads plant debris

2. Manual removal

☐ Yes ☒ No

Too large of areas

3. Sediment screens/covers

☐ Yes ☒ No

Other, non-target ecological system damage

4. Dredging

☐ Yes ☒ No

Too costly

5. Lake drawdown

☐ Yes ☒ No

No ability to draw down

6. Nutrient controls in watershed

☐ Yes ☒ No

not a control option for immediate concern

7. Other: _____

☐ Yes ☐ No

Note: If proposed treatment involves multiple properties, consider feasibility of EACH alternative for EACH property owner.

If you checked yes to any of the alternatives listed above, please explain your decision to use chemical controls:

**Chemical Aquatic Plant Control Application and Permit
WPDES Pesticide Pollutant Permit Application**

Form 3200-004 (R 02/17)

Page 3 of 4

Section V – Chemical Control (continued)

Full Trade Name of Proposed Chemical(s)

AquaStrike to Areas A-C for EWM control. AquaStrike for CLP/EWM control or Captain & Tribune for general nuisance to Area D
Area D to be re-surveyed prior to treatment to confirm presence of CLP. May require treatment for general nuisance relief after May.

Method of Application: WLPR's liquid sub-surface injection system

Will surface water outflow and/or overflow be controlled to prevent chemical loss? ☐ Yes ☒ No

Have the proposed chemicals been permitted in a prior year on the proposed site? ☐ All ☒ Some ☐ None

What were the results of the treatment?

AquaStrike has been used statewide to control EWM.

Early-season AIS control would be completed prior to thermocline formation - whole-lake rate below reflective of this & calculated with a volume of 834 ac/ft. Only endothall listed below, diquat rate ~0.01 PPM

For private ponds and wetlands please ignore next question

Is treatment area greater than 5% of surface area? ☒ Yes ☐ No

If yes, calculate whole lake concentration (in ppm). Refer to DNR Lake pages dnr.wi.gov/Lakes to answer the following:

Does the lake stratify? ☐ Yes ☒ No

If yes, calculate whole lake concentration using volume above thermocline.
If no, calculate whole lake concentration using total lake volume.

Whole Lake Concentration: 0.07 ppm

Note: Chemical fact sheets for aquatic pesticides used in Wisconsin are available from the Department of Natural Resources at the following link: dnr.wi.gov/Lakes/plants/factsheets/.

Section VI – Applicant Responsibilities and Certification

1. The applicant has prepared a detailed map which shows the length, width and average depth of each area proposed for the control of rooted vegetation and the surface area in acres or square feet for each proposed algae treatment.
2. The applicant understands that the Department of Natural Resources may require supervision of any aquatic plant management project involving chemicals. Under s. NR 107.07, Wis. Adm. Code, supervision may include inspection of the proposed treatment area, chemicals and application equipment before, during or after treatment. The applicant is required to notify the regional office 4 working days in advance of each anticipated treatment with the date, time, location and size of treatment unless the Department waives this requirement. Do you request the Department to waive the advance notification requirement? ☐ Yes ☒ No
3. The applicant agrees to comply with all terms or conditions of this permit, if issued, as well as all provisions of Chapter NR 107, Wis. Adm. Code. The required application fee is attached.
4. The applicant has provided a copy of the current application to any affected property owners' association, inland lake district and, in the case of chemical applications for rooted aquatic plants, to all owners of property riparian or adjacent to the treatment area. The applicant has also provided a copy of the current chemical fact sheet for the chemicals proposed for use to any affected property owner's association or inland lake district.
5. Conditions related to invasive species movement. The applicant and operator agree to the following methods required under s. NR 109.05(2), Wis. Adm. Code for controlling, transporting and disposing of aquatic plants and animals, and moving water:
 - Aquatic plants and animals shall be removed and water drained from all equipment as required by s. 30.07, Wis. Stats., and ss. NR 19.055 and 40.07, Wis. Adm. Code.
 - Operator shall comply with the most recent Department-approved 'Boat, Gear, and Equipment Decontamination and Disinfection Protocol', Manual Code # 9183.1, available at <http://dnr.wi.gov/topic/invasives/dlsinfection.html>

☒ Check if you are signing as Agent for Applicant.

I hereby certify that the above information is true and correct and that copies of this application have been provided to the appropriate parties named in Section II and that the conditions of the permit and pesticide use will be adhered to.

Signature of Applicant

3-15-18
Date Signed

All portions of this permit, map and accompanying cover letter must be in possession of the chemical applicator at time of treatment. During treatment all provisions of Chapter NR 107, specifically ss. NR 107.07 and NR 107.08, Wis. Adm. Code, must be complied with, as well as the specific conditions contained in the permit cover letter.

Section VII – WPDES Permit Request

Is WPDES coverage being requested? Refer to <http://dnr.wi.gov/topic/wastewater/aquaticpesticides.html> for more information.

- ☒ No: ☒ Already have WPDES coverage. ☐ Yes – complete section VII with signature
☐ WPDES coverage not needed

Select which permit you are requesting: ☐ WI-0064566-1 Aquatic Plants, Algae & Bacteria
☐ WI-0064564-1 Aquatic Animals
☐ WI-0064581-1 Mosquitoes & other Flying Insects

Indicate WPDES permittee responsible for the pollutant discharge: ☒ Applicator ☐ Sponsor

Do you expect the pest control activity will result in a detectable pollutant discharge to waters of the state beyond the treatment area boundary or a pollutant residual in waters of the state after the treatment project is completed? ☐ Yes ☐ No

If yes, identify the pollutant(s): _____

Are you planning to incorporate integrated pest management principles, as specified in the WPDES permit, into your pest control activity to minimize any pollutant residual or pollutant discharge beyond the treatment area? ☐ Yes ☐ No

Type of WPDES coverage being requested: ☐ One Treatment Site ☐ Statewide Coverage

For informational purposes, select areas of WI for most of your aquatic treatments: ☐ NW ☐ NE ☐ SW ☐ SE

Is WPDES coverage being requested for more than 1 year?

☐ Yes ☐ No If yes, the permittee will remain in "active" WPDES status until a Notice of Termination is submitted.

I hereby certify that I am the authorized representative (as specified in Ch. NR 205.07(1)(g), Wis. Adm. Code) of the pest treatment activity which is the subject of this permit application. I certify that the information contained in this form and attachments is, to the best of my knowledge, true, accurate and complete.

Please Note:

If you believe that you have a right to challenge this decision, you should know that Wisconsin statutes and administrative rules establish time periods within which requests to review Department decisions must be filed.

For judicial review of a decision pursuant to ss. 227.52 and 227.53, Wis. Stats., you have 30 days after the decision is mailed or otherwise served by the Department, to file your petition with the appropriate circuit court and serve the petition on the Department. Such a petition for judicial review shall name the Department of Natural Resources as the respondent.

This notice is provided pursuant to s. 227.48(2), Wis. Stats.

To request a contested case hearing pursuant to s. 227.42, Wis. Stats., you have 30 days after the decision is mailed, or otherwise served by the Department, to serve a petition for hearing on the Secretary of the Department of Natural Resources. The filing of a request for a contested case hearing is not a prerequisite for judicial review and does not extend the 30-day period for filing a petition for judicial review.

Proposed 2018 Treatment Areas

Kusel Lake, Waushara County
Surveyed: August 8, 2017

Please run the following ad once, immediately and send of a copy of the notice when it is published with the completed permit application, noting the date of publication

PUBLIC NOTICE

The Kusel, Wilson, Round Lakes Protection & Rehabilitation District proposes to chemically treat up to 20 acres on Wilson Lake and 5.85 acres on Kusel Lake for control of the invasive species curly-leaf pondweed (CLP) and Eurasian water-milfoil (EWM). Wisconsin Lake & Pond Resource will perform the initial treatment in for CLP control in April/May, 2018 and in May/June for EWM control only if necessary. The liquid herbicide Aquathol K (endothall active ingredient) will be used CLP while Aquastrike (active ingredients endothall and diquat) will be used for EWM. Warning signs will be posted within 150' of the affected areas at the time of treatment which will include any restrictions relating to fish consumption, swimming, or water use as follows;

***Aquathol K*® Treatment Areas for CLP:**

Lake users are able to use the treated water for any recreation activities (boating, swimming, fishing, etc), irrigation, or animal without restriction immediately after treatment. Do not use water treated with Aquathol K as a potable source unless concentration is below 0.1 PPM.

***Aquastrike*® Treatment Areas for EWM:**

Lake users are able to use the treated water for any recreation activities (boating, swimming, fishing, etc) and without restriction immediately after treatment. Users should refrain from using the water for human consumption for 3 days, turf and landscape irrigation for 3 days, agricultural irrigation for 5 days, and animal watering for 14 days following treatment.

The District will hold a public informational meeting on the proposed treatments if five or more individuals, organizations, special units of government, or local units of government request one in writing. The person or entity requesting the meeting shall state a specific agenda of topics including problems and alternatives to be discussed. The request for the public informational meeting must be sent in writing to Kusel, Wilson, Round Lakes P&R District, N5490 N Wilson Lake Road, Wild Rose WI 54984 and to Wisconsin Department of Natural Resources, 625 East County Road Y, STE 700, Oshkosh, WI 54901 within five days of this publication.
